LCD/ Plasma Ceiling Mount **3 Movement - Telescopic, Swivel & Tilt**

35

Model

- Minimum distance from ceiling: 19.25"/ 49 cm
- Maximum distance from ceiling: 30.2"/ 77 cm

Color:  **Max. Weight: 66Lbs / 30Kg**

Ceiling mount with prestigious and innovative "Butterfly" design for LCD/ Plasma screens up to 66 lbs / 30 kgs. Made for when unable to attach to the wall. Includes telescopic mechanism allowing for flexible height adjustment of screen. The mount allows for maximum swivel and tilt. Includes cable management, fall proof mechanism, locking mechanism against theft, and screen leveling. Quick and easy assembly and installation. Sold in color silver combined with metallic black. Lifetime warranty.

Innovative & Exclusive Butterfly Design
Integrates aesthetically with rear side of LED/ LCD/ Plasma Screens, especially Ultra Slim

Compatible to Ultra Slim screens up to 56" and to standard screens according to their weight.

Also compatible for LED screens and larger screen sizes, where their specifications comply to the mount.

Designed to fit:

SHARP, SONY, PHILIPS, SAMSUNG, TOSHIBA, PANASONIC, NEC, LG, PIONEER, VIZIO, RCA/ THOMSON, JVC, DELL, FUJITSU, LOEWE, AKAI, HITACHI, HAIER, TELEFUNKEN, WESTINGHOUSE, SANYO, GRUNDIG, BEKO, VESTEL, METZ, ORION, DAEWOO, HISENSE, CHANGHONG & Other popular brands.

Design Patent: 955760-001.

Fits LCD mounting holes up to 400X400mm
(VESA & Non VESA).

Hole pattern including: 75X75, 100X100,
100X200, 200X100, 200X200, 300X300 mm.

For mounting holes up to 600x400 mm, add
model 38 adaptor.

Product Benefits

FALL & THEFT PROOF

Secure locking system, preventing theft and accidents.

SCREEN LEVELING

A built-in mechanism to adjust the screen.

TOUCH & TILT

Tools free tilt adjustment enabled by automotive friction brake-pads.

FRICTION ADJUSTMENT

One handed tighten or release tilt resistance mechanism.

CABLE MANAGEMENT

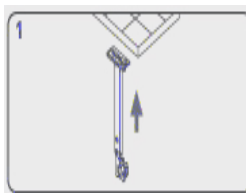

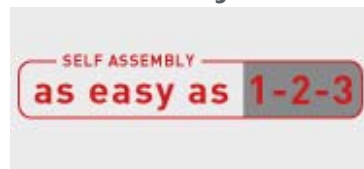

Hides cables inside the mount for a clean, wire-free look.

HEIGHT ADJUSTMENT

Choice of 3 height positions for enhanced viewing quality.

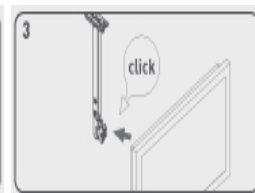

Self Assembly

1 Install the bracket on the ceiling.

2 Attach adapter to the rear side of electronic device.

3 Snap the electronic device onto the bracket.

The "Butterfly" design story, patented for mounting system

We looked for additional ways to improve the viewing pleasure of end users with Barkan products. We consulted with numerous designers and all suggested subtle changes without jeopardizing the integrity of the product. We weren't satisfied with the proposals, and continued to search for an original idea. One day, our in-house designer looked at our connecting mechanism and suggested "why not design a mechanism similar to an animal all are familiar with". We tried a number of animals and came up with a butterfly shape. Animals in the wild, through generations of evolution, have developed a body structure enabling them optimal and flawless movement in the air, sea and land. By using their effectiveness and ability to work in harmony, we have implemented these various characteristics in the development of mounts and connecting mechanisms to the TV. We have succeeded to harness the most efficient movement of animals, to our new product design, which transformed the viewing possibility to a more diversified application as compared to what is presently available in the market.
